Cymbidium Smithsonian Gardens

Cymbidium s are light-loving orchids. The best place for them indoors is near an east facing window or a slightly shaded south window. Cymbidiums need a temperature difference between night (50-60° F) and day (about 75° F) to bloom well. Miniature Cymbidium s can flower at temperatures 5-10 degrees warmer than this.

Care of Cymbidium - Smithsonian Gardens

Our annual orchid show is back and it's mesmerizing! More than 100 stunning blooms are featured at the 2017 Orchid Exhibition presented by Smithsonian Gardens and the United States Botanic Garden.

orchids: A MOMENT (Cymbidium Chen's Ruby 'Gold Tiger')

And these two only make up a fraction of the 8,000+ orchids in Smithsonian Gardens' collection. Fortunately, there's a system in place that helps keep track of the many plants in the Smithsonian Gardens Orchid Collection. This is extremely important because as a "living collection" it's always growing and changing.

Plant Explorer | Smithsonian Gardens

By 1987, when the Enid A. Haupt Garden officially opened in the South Yard of the Smithsonian Castle, the space had served myriad purposes for nearly a century and a half: as a bison grazing ground, astronomical observatory, taxidermy studio (for the Natural History Museum), and aircraft and rocket showcase (before the Air and Space Museum).

Enid A. Haupt Garden — Dumbarton Oaks

A plant production facility, completed in 2010, is located at the Museum Support Center in Suitland, Maryland serves as the base of production and maintenance of plant material for the gardens and horticultural exhibits throughout the Smithsonian Institution.

Smithsonian Gardens - Wikipedia

I mentioned awhile back that I wanted to keep an eye out for the Smithsonian Gardens' annual orchid exhibit. Well, just last week I discovered that the exhibit, called Orchid Spectrum, is running from February 23 to April 8 at the United States Botanic Garden. So on Monday I took a chilly walk on over to check the exhibit out!
