Avamar Administrator. The Avamar Plug-in for vSphere Web Client supports one vCenter Server per Avamar server. If you need to manage multiple vCenter Servers, use Avamar Administrator. The Avamar Plug-in for vSphere Web Client requires Avamar Proxies to be installed and configured. See the Avamar for VMware User Guide for additional details on

vSphere Web Client Administration Guide

Consult the Avamar System Administration guide which is available from the Avamar server "Documents & Downloads" page on the Dell EMC web site support.emc.com. In the System Administration guide, locate the section which discusses the Avamar Server shutdown and restart procedure. Follow the instructions in the guide to shut down the Avamar software services. Single Node / Avamar Virtual Edition systems:

Avamar: Instructions to safely shutdown and restart a ...

The output prompts you to change SSH keys. If you do not want to add or change a key, type n and press Enter. To create an admin or dpnid OpenSSH key or to change an existing key, type y and press Enter. Follow the prompts to create or change the keys. The output prompts you to change Avamar server passwords.

Change the Avamar password - Dell

This publication is primarily intended for EMC Field Engineers, contracted representatives, and business partners who are responsible for configuring, troubleshooting, and upgrading Avamar systems at customer sites, as well as system administrators or application integrators who are responsible for installing software, maintaining servers and clients on a network, and ensuring network security.

EMC® Avamar® Product Security Guide - Dell

On the Avamar Utility Node, check that the Avamar Administrator MCS configuration file "mcsserver.xml" contains the correct 'smtpHost' value in order that email messages will be successfully routed. For more information, see the System Administrator Guide section "Automatic notifications to EMC Customer Support" for instructions on how to check and correct the 'smtpHost' setting
