Forensic Pathology

Forensic pathology is pathology that focuses on determining the cause of death by examining a corpse. A post mortem is performed by a medical examiner, usually during the investigation of criminal law cases and civil law cases in some jurisdictions. Coroners and medical examiners are also frequently asked to confirm the identity of a corpse.

Forensic pathology - Wikipedia

Forensic pathologists are physicians who specialize in pathology through a residency that may extend three to four years beyond medical school. An additional one-year residency in forensic pathology will enable a pathologist to become certified in forensic pathology.

Forensic science - Forensic pathology | Britannica

Forensic pathology refers to an area of study; not an individual. It can be defined as "a branch of medicine that applies the principles and knowledge of the medical sciences to problems in the field of law," (DiMaio & DiMaio, 2001, p. 1). Consequently, to be a practicing forensic pathologist, one must also be a medical doctor.
