Risk Management | Introduction to Insurance | Alison

The risk formula $RISK = IMPACT \times (THREAT \times VULNERABILITY)$ incorporates the three risk factors for determining and assigning a more precise risk rating. Introduction to Risk Management Student Guide 6 of 7 In this formula, the "Threat x Vulnerability" value represents the probability of the undesirable event occurring.

Introduction to Risk Management Student Guide

Uncertainty is not knowing what will happen in the future. The greater the uncertainty, the greater the risk. For an individual farm manager, risk management involves optimizing expected returns subject to the risks involved and risk tolerance. Agricultural producers make decisions in a risky environment every day.

Introduction to Risk Management

With this chapter you begin your study of risk management and insurance. This chapter provides a working definition of risk and a discussion of the various types of risk. Some risks that we face are uncertain losses caused by perils. Hazards are conditions that increase the chance that a loss will occur.
