Economic reality is more complex than any human mind can completely understand. To be useful, economic theory must give us a simplified picture of this reality. In microeconomics the usual way to simplify is to use partial equilibrium analysis. Partial equilibrium analysis assumes that we can look at part of the system in isolation, ignoring ...

As the COVID-19 pandemic continues, US policymakers must consider containment measures while weighing adverse health outcomes against forgone economic activity. This column uses panel data to evaluate alternative strategies to keep COVID-19 in check. Viable options to keep new case counts on a downward trajectory without economically costly shutdowns include more testing (at
