Restart the computer. Open the Services management console (services.msc) again. Change to Automatic the start type of the service or services that had their start type changed in step 2, that depend on the ASP.NET State Service, and that now have their start type set to Manual.; Restart the computer, and then confirm that the issue is resolved.

Services that depend on the ASP.NET State Service do not ...
24 Comments. You have some assumptions. First of all that the data is still there after a roundtrip (postback). Doing manual paging is done for only one reason and that is preventing extra data transmitted in the viewstate so that the gridview, etc. do not have to use the viewstate to hold all data.
