Add to estimate: 2. Subtract to estimate. $715 = 1213 - 7 = 67.38214.971212.57 - 6.806 \approx 6$
You can also round the numbers to any decimal place. Estimate the sum. Round to the nearest tenth. $3.947111.2863.9111.3515.2$, so $3.947111.286 \approx 15.2$ Round each number to the nearest whole number to estimate the answer. 1. 4.38 1 9 ...

Name 4-1 Estimating Sums and Differences

4.2 Estimate Sums On Thursday 276 people came to the school concert. On Friday 138 people came to the concert. About how many people came to the concert in all? To estimate a sum, you can round the addends. Estimate 276 138. Round each number to the greatest place. Then add. Problem Solving 10. Tara bought a ticket to the concert for \$2.75. She bought flowers for

Name Date Homework 4.2 Estimate Sums - eduplace.com

For example, the standard practice for estimating sums and differences of fractions for grammar school students seems to be rounding to the closest $\frac{1}{2}$ by rounding to 0, $\frac{1}{2}$ or 1. This works well through a calculator such as if you are adding $\frac{3}{8} + \frac{11}{16}$. $\frac{3}{8}$ is closest to $\frac{1}{2}$ and $\frac{11}{16}$ is less than $\frac{3}{4}$ so it is also closest to $\frac{1}{2}$.

Estimating Sums and Differences of Fractions Calculator

Estimation worksheets encompass a huge collection of printable sheets on rounding and estimation. It contains estimating the count, estimating time, estimating sum, difference, product and quotient, estimating fractions and decimals, rounding whole numbers, fractions and decimals and rounding money.
