### **Poly4 Product Handbook Sirius Minerals**

POLY 4 is the trademark name for polyhalite products from Anglo American's Crop Nutrients business. POLY4 is a multi-nutrient and low-chloride fertilizer suitable for organic farming. Derived from a naturally occurring mineral polyhalite, POLY4 contains four of the six essential macro nutrients required for plant growth: potassium, sulphur, magnesium and calcium.

### **siriusminerals.com**

Independent testing examined the impact of POLY4 on the characteristics of compacted, steam and chemically granulated NPK fertilizer products. This handbook gives a summary of the actual testing results using real data and displays physical and chemical properties of MOP, urea-based and AN-based NPK products.

### **POLY4 | Product characteristics**

Sirius produces POLY4 by extracting polyhalite — a rare evaporite mineral low in chloride — from a mine in North Yorkshire, crushing and grinding the mineral and then granulating the resulting powder using a starch binder from ADM under a patented process. ADM Fertilizer serves as the distribution partner for POLY4 in North America.
