These diagrams, which were used for my renderings, are generic models, not to any specific prototype. They were created to test color schemes. See Michael Eby's site for a comprehensive list of detailed freight cars. Maintenance of Way

Rolling Stock Line Drawings - TrainWeb.org

A railroad switch (AE), turnout, or [set of] points (BE) is a mechanical installation enabling railway trains to be guided from one track to another, such as at a railway junction or where a spur or siding branches off.. The switch consists of the pair of linked tapering rails, known as points (switch rails or point blades), lying between the diverging outer rails (the stock rails).

Railroad switch - Wikipedia

The link-and-pin coupling was the original style of coupling used on North American railways. After most railroads converted to semi-automatic Janney couplers, the link-and-pin survived on forestry railways.While simple in principle, the system suffered from a lack of standardisation regarding size and height of the links, and the size and height of the pockets.

Railway coupling - Wikipedia

The world's first passenger train or tram was the Swansea and Mumbles Railway, in Wales, UK. The Mumbles Railway Act was passed by the British Parliament in 1804, and horse-drawn service started in 1807. The service closed in 1827, but was restarted in 1860, again using horses. It was worked by steam from 1877, and then, from 1929, by very large (106-seater) electric tramcars, until closure in ...

Tram - Wikipedia

LNER Class A3 4472 Flying Scotsman is a Pacific steam locomotive built in 1923 for the London and North Eastern Railway (LNER) at Doncaster Works to a design of Nigel Gresley. It was employed on long-distance express East Coast Main Line trains by the LNER and its successors, British Railways Eastern and North-Eastern Regions, notably on the London to Edinburgh Flying Scotsman train service ...
